

# A Quick Integrated Modeling & **OnLocation Services Guide**

# Interconnected Energy Markets: Why integrated modeling?

Integrated modeling analyzes how multiple sectors interact to better understand the impact of policies and technologies on energy markets, the economy, and the environment. Policies and technologies in these markets are driven by many factors...

- Changes in domestic oil & natural gas supply
- Desire for clean, efficient, & reliable electricity
- Climate initiatives to reduce greenhouse gas emissions
- Public interest in renewable & efficient energy sources

## Our Process: How do we help?

Since 1984, we've helped stakeholders and policymakers understand and respond to challenges facing our energy system. Our services are customized to what you need, but typically include:

1. **Schedule** Initial Meeting for Free Consultation
2. **Provide** a Thorough Brief on Proposed Approach
3. **Design** Scenarios & Determine Data Inputs Together
4. **Apply** Model Modifications & New Features (if needed)
5. **Run** Scenarios & Analyze Results
6. **Deliver** Insights & Answers to Your Questions

Head to our [website](#) to learn more about our process and see how we can help...

**Helping clients** with energy-related solutions since 1984.

**At OnLocation,** we develop, enhance, and apply energy modeling to help our clients understand and respond to the challenges facing our energy system.

**Inform** Energy & Environmental Policy

**Evaluate** Role of New Energy Technologies

**Explore** Alternative Energy Futures

**Consider** Critical Materials

**Innovate** Integrated Energy Models

**Assess** Climate Impacts on Energy

## What service options are available?

After meeting to discuss your objectives and budget, we'll work together to determine how we can best help you through one of our available service plans.

- Annual Retainer Contracts
- Multi-Year Contracts
- Short-Term Studies (1-3 months)
- Individual NEMS Scenarios
